

# Agricultural & Domestic Highway Grid Datasheet

## Steel Specifications:

- . Steelwork CE Certified
- . BS 4008:2006 and Euro BS EN 1991-2 Part 2 compliant
- . Steelwork Hot Dip Galvanised finish
- . To suit any road width 3m to 8m
- . Optional painted or self colour steelwork

## We offer the following services:

- ✓ Full groundworks and grid installation
- ✓ Hiab delivery

- . Suitable for Deer, Cattle, Horses
- . 26 Tonne Precast Concrete Grids
- . 26- 50 tonne All Steel Drop in Grids
- . Bespoke grids in Box, RSJ or CHS

## 26T Precast Grid

Precast grids are ideal where a concrete base is required; this may be a new grid or replacing an old grid.  
Precast is suitable for Agricultural or Domestic use.

### Comparisons:

- ✓ Precast is factory controlled and includes reinforcing steel to provide a very high quality base and walls.
- ✓ All precast grids include drainage as standard.
- ✓ Concrete grids naturally wash and are fairly easy to clean, whereas drop in grids with a gravel base are subject to fouling and are more difficult to clean.
- ✓ Precast grids can be installed in one day.

# 26-50T Drop-in Grids

Drop-in grids are a cost effective solution.  
Installation time: 1 day

## Bespoke Grids

Triangle can design and fabricate bespoke grids to fit any existing concrete base. These are available in RSJ, CHS (round tubing) or box section. Can be fixed to an existing base.

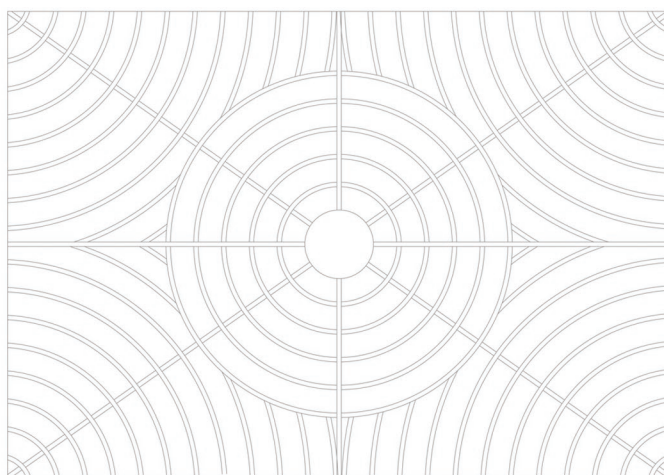

# Specialist Architectural Grids

Triangle can design and fabricate specialist Architectural grids. These are more costly than off the shelf or bespoke grids but add a unique and personal touch to any property.
